

DIGITAL BRIDGE Technologies, Inc.

Digital Bridge Technologies, Inc. is now working as a Full Service Dealership, providing our past, present and future Buskro customers with a strategic product line of new or fully warranted refurbished equipment as well as quality service, parts and consumables. This line of Buskro products consists of a cadre of various inkjet technologies from our "Entry Level Affordable" to our "Print on Anything" technology.

Take on more jobs. Earn more revenue. Boost your business profits with the ability to print faster, wider and with a higher degree of print quality and consumables control. You can add graphics, maps and logos at full 660DPI resolution. You will be able to increase production on greater number of products and materials by using our UV Curable Ink technology. This UV Curable Technology has been designed and engineered to afford you a broad range of substrate capabilities including plastics. The controllers we have engineered and equipped with our own "Compose 10 software" moves your business into the future with a multi-platform print control by utilizing Windows 7, 8 or 10 Operating Systems. So before your product leaves the building, ensure it is customized, personalized and attractive to maximize its advertising potential. Cutting, folding, tip-on attaching and poly-bagging are important to your customized, finished product. But, when you need to personalize it, count on Buskro inkjet and our control systems for versatile printing of variable data and it's value-added features.

We continue to provide complex mail & print control processes that demand sophisticated control and job management. We also offer our own complete line of transport bases and Tabbers that feature rugged, heavy-duty construction that promote years of trouble free operation whether it be an in-line or our traditional offline production environments, they have been designed and built to our highest standards of durable dependability. Buskro products are designed to be modular and easily integrated into any of your production workflows - whether it is on your finishing equipment or on a quality Buskro in-line base. If you need to personalize it, count on Buskro systems to provide you with the robust system you need.
