Revolutionize Your Data with Precision, Performance & Productivity

From our first Postmaster General, Benjamin Franklin to the Pony Express, and today's must-have 2-Day Shipping memberships, mailing systems have been a hub of innovation for information transformation for nearly 250 years. **Getting the right stuff to the right people — at the right time — is crucial to building connections throughout the country and around the globe.**

Firstlogic Solutions' Postalsoft software has been delivering trusted results to the mailing and postal industries for over three decades, and we're ready to fuel the next phase of innovation. **The Firstlogic® DQ10 ACE®, DataRight IQ®, Match/Consolidate® platform delivers:**

Precision

Driven by the industry's most reliable CASS™ engine, ACE® powered by SAP®, parses and cleanses even the dirtiest data in real-time and batch with updates from USPS® CASS™, NCOALink® and DSF2®. And how does ACE do it? It's the power of the parsing engine.

Performance

Our multi-threaded platform corrects, cleanses, de-duplicates, and households data at up to 4X the speed of our competitors. We unlock this potential by offering 3 deployment options: "on-premise" software, "in-cloud" services or a hybrid "on-premise/in-cloud" combination.

Productivity

Firstlogic DQ Workflow™ is the first U.S. and International solution that builds custom processes and standard functions with an icon-based, "drag & drop" user interface. By simplifying and automating repeatable processes, our customers have increased quality and productivity while reducing operational time and costs.

Trusted

We're proud to be SAP's leading Gold Partner specializing in data quality. **Our team members have worked with this technology for 25 years;** shaping it, supporting it, and sometimes reengineering it to develop the best solutions available. Firstlogic Solutions is also a trusted reseller of SAP's enterprise data services solutions delivering a unified data quality and data integration solution to measure, improve, consolidate and deliver data anywhere.

Ready to take your data into the fast lane? Call 888-725-7800 for more information or visit FirstlogicSolutions.com for a full list of data quality solutions.
