

Founded in 1976, Buskro has evolved into an industry leader in the design and manufacture of personalization equipment including inkjet printing, MAG and RFID encoding, tabbing/labelling, card processing, and label printing equipment to satisfy a broad range of customer needs. Our approach of adopting and incorporating the latest innovative personalization technologies coupled with our open architecture, permits our products to remain productive for many years by meeting your current needs and offering upgrade paths for your future requirements. Buskro offers both complete systems as well as customized integrated solutions to suit your personalization requirements. Our wealth of experience and extensive installed customer base gives you the confidence that BUSKRO solutions are robust and can be seamlessly integrated onto your pre-existing systems.

Buskro offers a full suite of UV, aqueous, food grade, security, and CMYK inks to support all printing and graphics applications on a wide variety of porous and non-porous printing materials including paper, plastics, foils, and web printing. Powered by Buskro's true and tried Compose IQ software, job setup, handling, and personalization (printing, MAG and RFID encoding) is a breeze. Standard features allow for data input, job management, print layout preparation, audit file reporting, and personalization element (printing & encoding) configuration while the more advanced features opens a wealth of applications such as read and print, duplex printing, real-time inspection & verification, product remake and error handling, and color printing. In short, Compose IQ software provides all the tools needed to handle most personalization jobs while giving you the reassurance that the personalization is complete, accurate, and accounted for.

Buskro's line of inkjet technologies ranges from our Apollo (HP) employing HP45A style cartridges and which offers a low capital investment and ease of use/maintenance, through to our industrial high-volume, high-resolution print systems such as the ATOM and Quantum self-standing units available in a variety of print swaths and ink formulations for all of your mailing and printing applications.

BUSKRO offers a variety of standard and custom personalization solutions for the commercial printing, mailing, label, packaging, and card industries. Some applications include:

- ▶ Matched mail inspection for personalized documents, inserts, and envelopes
- ▶ Card/carrier and magnetic stripe matching, including PIN number verification
- ▶ Inserter output scanning for duplicate, sequential document, postage break, and indicia/stamp identification
- ▶ In-line read and print inkjet printing
- ▶ Duplex printing on multiple surfaces both visible and covered
- ▶ Production integrity verification to ensure complete production and formal reports to prove it for transactional documentation compliance
- ▶ Box printing and labeling
- ▶ Card printing, MAG, and RFID encoding
- ▶ Near-line, high-speed label inkjet printing and RFID encoding

Working with Buskro's global network of distribution partners, we take pride in providing quality service and support for all of our products, including our legacy technologies.
