## COMPANIES

For 100 years, Pitney Bowes has crafted innovative sending technologies that empower businesses of all sizes to ensure they get it right every time they send, by simplifying the complexities of mailing and shipping. Sending is at the core of everything we do.

Pitney Bowes continues to offer industry-leading mail inserting solutions along with innovative high-speed inkjet printing systems that help high volume production mailers increase productivity and lower print costs. Add to that the power of digital solutions that enhance and scale their mailing solutions, and businesses now have access to valuable tools that help optimize productivity, accuracy and compliance.

Shippers of all sizes can access industry-leading multi-carrier shipping via the SendPro® family of solutions, which brings together enterprise-caliber postal and multi-carrier shipping capabilities to take the guesswork out of selecting the right service level and carrier for each piece. Receiving solutions are offered via SendSuite®, which offers the flexibility of being installed on-premise, hosted or cloud-based. By adding an Intelligent Locker to a receiving operation, package delivery and pickup becomes streamlined, efficient and contactless — for workers and recipients.

Through our connected digital eco-system of hardware and SaaS, we offer the latest analytics tools to help you get more from your sending solutions. We provide you the data and insights about everything you send, how much you've spent, how much you saved and identify new savings opportunities across your organization. In addition, data on your receiving operation helps you monitor and improve productivity on package delivery and pickup.

From the world's largest mailers and shippers to the smallest home offices, Pitney Bowes delivers innovative and scalable sending technology solutions to drive more value and help businesses grow.

Let Pitney Bowes help you simplify sending. [pitneybowes.com](http://pitneybowes.com)
