Rena By Quadient, formerly known as Rena By Neopost, may have a different name and logo, but the brand's quality products and exceptional value remain the same. Rena's parent company changed its name from Neopost to Quadient earlier this year.

Rena offers an all-inclusive line of monochrome address printers. The AS-450, AS-650, and AS-850 each include modern designs, an easy-to-use color touch screen, the ability to print on UV stocks, and more! They are great for any size business, including but not limited to entry-level mailers, schools, commercial printers, and packaging/fulfillment companies.

Rena occupies space in the digital printing world as well. The Rena MACH 6 uses revolutionary technology from Memjet® and has an all-new design. The MACH 6 is capable of printing full color graphics and variable data on a variety of material, including substrates up to 3/8" thick, such as stuffed envelopes, chipboard, corrugated cardboard, folding cartons, and much more. It is great for printing long runs, but also perfect for those on-demand short runs.

Rena also offers its first toner-based system, the OKI C900 Series. Consisting of the C931 and the C942, these workhorse machines allow you to extend your in-house printing and presentation capabilities to a whole new level. Produce stunning documents on a wide variety of stocks, plus print with white toner on the C942!

Rena is a brand of Quadient, a company that is the driving force behind the world's most meaningful customer experiences. By focusing on four key solution areas including Customer Experience Management, Business Process Automation, Mail-Related Solutions, and Parcel Locker Solutions, Quadient helps simplify the connection between people and what matters. Quadient supports hundreds of thousands of customers worldwide in their quest to create relevant, personalized connections and achieve customer experience excellence.

All of Rena's products are designed, engineered, and manufactured in the USA with the primary focus on providing the highest quality products on the market. We invite you to learn more at [www.renausa.com](http://www.renausa.com).
